

The History of SMK Taruna Bhakti

Yayasan Setya Bhakti previously established SMP Taruna Bhakti in 1987 that had 1200 students. Based on that, Yayasan Setya Bhakti had a sincere will to established higher education for society, SMK Taruna Bhakti

SMK Taruna Bhakti Vocational High School was established on June 16, 2004 which is located in Pekapuran, Curug Cimanggis Depok. At the beginning, We had only one major: Information and Communication Engineering in Competency skill Network and Computer Engineering

At the first year, we only had three permanent building yet it had not had any windows or doors and the number of students are only 126 students in three class groups.

Nowadays, in 2021 Facilities and Infrastructure of SMK Taruna Bhakti has been developed fast which we have 11 Computer Lab consist of 20 PCs in each Lab.

There are five Competency Skill:

1. Computer and Network Engineering
2. Multimedia
3. Software Engineering
4. Broadcast
5. Technical Industrial Engineering

To meet the need for high quality human resources in the mastery of science and technology based on the spirit of faith and piety, SMK Taruna Bhakti Depok is designed to equip students to master science, especially in the field of quality Information and Communication Technology, and have life skills. The SMK Taruna Bhakti learning program pays special attention (characteristic) to mastery of ICT.

In addition to learning in the classroom (intracurricular) and developing talents / interests through extracurricular activities, students broaden their horizons through various programs that equip students to have life skills, including: Character Building, Science Camp, Bringing Guest Teachers from the relevant Business / Industry, etc., and provide broad opportunities for students to compete in academic and non-academic fields at the national, regional and international levels.

The learning process and effectiveness are supported by competent teachers, guidance and counseling, as well as complete educational facilities.
